Cisco Graduate and Internship Programs 2011

Why Choose Cisco?

Each year our industry and the global economy change dramatically. Experience, exposure, education and collaboration are key success factors for our employees to excel. As the market leader in Internet technologies, Cisco provides you the opportunity to gain these skills, and work with top talent in shaping your career while creating the network solutions of tomorrow. Join Cisco and innovate the way the world works, lives, plays and learns!

So why should you join Cisco? A career with Cisco can offer you:

• The opportunity to work in one of the most successful engineering organizations in the world
• Access and exposure to next generation technologies
• Training, coaching and mentoring by experienced industry experts
• Ability to earn industry-leading certifications
• Opportunity to work in a uniquely diverse and socially responsible environment
• Highly competitive salary with great benefits
• A significant investment by Cisco to your ongoing career development and success

OPPORTUNITIES

1. Full Time: Customer Support Engineer (CSE) – Sydney
   Main Job Responsibility - Troubleshooting Technologies
   With a full suite of Cisco tools and resources available to you, we will help you gain both technical and professional skills such as leadership, project management and team work in order to nurture you into a well-rounded professional engineer. We train you on the job, while you help our customers develop and complete test plans to help isolate and solve their issues. Our training enables you to provide solutions to assist customers with their design, execution and maintenance processes as well as gaining CCNP and CCIE certifications.
2. **Internship: Customer Support Engineer (CSE) – Sydney**

**Main Job Responsibility - Build Recreates**

A recreate is Cisco’s term for an engineering test bed, which are used to help troubleshoot and isolate customer network and design problems. Recreates can be very complex and involve both foundation and next gen technologies such as cloud computing, borderless networking, content delivery network and much more. As well as providing full on-site training, we empower you to gain industry recognised certifications such as CCNA or CCNP.

**Note:**

*Our internships are for six months, and are full time.* This will require you to gain permission from your university to undertake this as a work experience, or to defer one semester of study. Proof of enrolment after the internship period will be requested.

**HOW TO APPLY**

Start contributing to tomorrow’s technology today! Internships start July and Graduate positions start September 2011 in Sydney. A large majority of our interns join Cisco on graduation!

The recruiting process starts with your application. Please visit our Facebook page to find out open positions and apply!

Closing date is *5pm, Friday, 22 April 2011*

**Cisco ANZ Facebook:** [www.facebook.com/CiscoURANZ](http://www.facebook.com/CiscoURANZ)

**Global University Connection Website:** [www.universityconnection.ciscoeos.com](http://www.universityconnection.ciscoeos.com)

**Note:**

- Students must have **Australian Permanent Residency** or **Citizenship**.
  (Proof will be requested during background check process if offer extended)
- Applicants to intern roles must be enrolled in full time education both before and after the internship period.
