Student Mentor - Computing
Paid Part Time Position

An opportunity exists for a UTAS Computing Student to work with and mentor a gifted and talented Year 9 student, with special learning needs, at St Patrick’s College.

The role will entail working with an individual student on a one-to-one basis to explore computing, with a particular emphasis on computer programming, in order to provide some ‘real world’ perspective and guidance on a subject that the student in question has a particular interest in and talent for.

Mentoring sessions will take place on a weekly basis for a 10 week period and involve a combination of discussion and practical computing and programming activities.

In addition to sound computing and programming knowledge, the mentor must possess strong interpersonal and communication skills, patience, a calm and mature approach as well as the ability to successfully undertake a National Police Check.

Suitable applicants should provide the College’s Human Resources Coordinator, at Geoff.Dodds@stpatricks.tas.edu.au, with their current resume, including details of academic results to date, together with a brief letter of introduction by Friday 24 July 2009.

St Patrick’s is a Catholic co-educational Year 7 - 12 College of 1362 students with a strong academic culture that encourages individual students to develop to their full potential through a broad educational experience.
