KXO104 Business Computing

February - June 2009
Shanghai, China

Unit Coordinator
Dean Steer
E-Mail: Dean.Steer@utas.edu.au
Phone: (03) 6324 3693
Room: V169, Newnham Campus, Launceston

UNIT OVERVIEW

Introduction
This unit is an introduction to a modern programming language, Java; the development of program specifications in English, and the implementation of these computer programs; the elements of disciplined programming using well-structured algorithms; program documentation; the design of data structures: simple variables, arrays and objects. The program exercises used will be oriented towards business applications.

This unit seeks to develop knowledge and skills in:

- The development of programs in a modern programming language
- The use of data structures to model information
- Documentation of computer programs
- Analysis and design of simple algorithms

Prerequisites
None

Unit Weight
12.5% of one academic year

Teaching Pattern
Teaching is grouped into 13 modules which include: 26 lectures, 12 tutorials, and 10 directed learning activities.

Unit Content
- Introduction to the Java Programming Language
- Data and Expressions
- Using Classes and Objects
- Writing Classes
- Conditionals and Loops
- Object-Oriented Design
- Arrays
- Inheritance
- Polymorphism
- Exception Handling

For more information see the section titled 'Content' on the unit website.
Prior Knowledge and/or Skills

It is assumed that students studying this unit have sufficient mathematical and logical skills and knowledge to understand the logic of computer programming, and to be able to design, implement and verify basic computer programs.

Learning Outcomes

On successful completion of this unit, you will be able to:

1. Develop simple computer programs in Java, including the use of common object classes;
2. Be able to interpret and modify a range of small to medium existing Java programs in order to alter their function or behaviour;
3. Be able to develop algorithms using a methodological approach;
4. Be aware of the style, purpose and importance of documentation associated with software development; and
5. Be aware of a range of business applications that can be developed using the Java programming language.

Generic graduate attributes

The university has defined a set of generic graduate attributes expected in its graduates. [http://www.utas.edu.au/policy/subject.html#graduates](http://www.utas.edu.au/policy/subject.html#graduates) Your course is designed to enable you to develop generic skills that are valued in, and expected of, graduates. These are skills that you will need to develop over time. Hence you are encouraged to look for opportunities, as you study each unit, to reflect on and improve these skills.

Unit specific skills:

- Develop an introductory knowledge of computer programming, using Java;
- Understand the process of development, and nature of, common algorithms;
- Be capable of applying this knowledge to the development of simple computer programs;
- Be aware of the importance of adequate client consultation when developing the requirements for computer software;
- Understand the nature and importance of documentation to support the interpretation and maintenance of computer software;
- Be capable of applying a well defined programming methodology to the solution of basic problems, through algorithmic specification into working Java programs;
- Understand the importance of the production of correct software that has been rigorously tested and verified correct against its requirement specifications;
- Understand the key issues faced by software developers from any culture in the development of correct software;
- Understand the importance of the production of correctly verified software in the processing of information and integration into critical systems.

UNIT ASSESSMENT

Assessment Pattern

Internal (30%), Exam (70%)

Assessment Summary

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
<th>Due Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignment 1</td>
<td>15%</td>
<td>9:00 pm (Shanghai time) Friday of each Module</td>
</tr>
<tr>
<td>Assignment 2</td>
<td>5%</td>
<td>9:00 pm (Shanghai time) Tuesday 31st March, 2009</td>
</tr>
<tr>
<td>Assignment 3</td>
<td>10%</td>
<td>9:00 pm (Shanghai time) Tuesday 12th May, 2009</td>
</tr>

</table>

Assessment Items

**Item 1**
- **Title:** Assignment 1
- **Type:** In-Semester - learning tasks
- **Task Length:** not applicable
- **Weighting:** 15%
- **Links to Learning Outcomes:** 3, 4, 5
- **Due:** 9:00 pm (Shanghai time) Friday of each Module
- **Description:** This is an individual assignment that requires students to log onto MyLO to complete a series of True / False and Multiple-choice questions that relate to material covered by the textbook chapter each module. This allows students to demonstrate their knowledge of the topics covered in the corresponding module, and to familiarise themselves with Java concepts, terms, syntax, and semantics.

**Item 2**
- **Title:** Assignment 2
- **Type:** In-Semester - individual assignment
- **Task Length:** not applicable
- **Weighting:** 5%
Links to Learning Outcomes: 1, 2, 4
Due: 9:00 pm (Shanghai time) Tuesday 31st March, 2009
Description: Develop additional functionality for an existing Java language application by revising a class to extend the base Java language code provided.

Item 3
Title: Assignment 3
Type: In-Semester - individual assignment
Task Length: not applicable
Weighting: 10%
Links to Learning Outcomes: 1, 2, 4, 5
Due: 9:00 pm (Shanghai time) Tuesday 12th May, 2009
Description: Develop a Java language application by writing classes to provided the required functionality

Item 4
Title: Examination
Type: Formal Examination
Task Length: 2 hours
Weighting: 70%
Links to Learning Outcomes: 3, 4, 5
Due: University Examination Period
Description: This is a closed book exam. However, two A4 sides (one sheet of A4 paper with writing on both sides, or two sheets of A4 paper with writing on one side of each sheet) of handwritten notes to be handed in with the exam booklet are permitted.

See the 'Assessment' section in unit website for more detailed information about assessment items.

How your Final Grade will be determined
Overall assessment will be based on the student’s performance throughout the semester as well as in a formal examination. In order to achieve a pass (or better) result, a student must obtain:

1. at least 45% of the total mark for in-semester assessment items
2. at least 45% of the mark for the formal examination
3. at least 50% of the overall mark

UNIT RESOURCES

Unit Web Site
This unit is Web Dependent: content. This means that you will need to use the Web for this unit. The unit website contains unit information and resources.
The unit website is accessed from http://www.utas.edu.au/coursesonline/. You will need to use your University of Tasmania email pop account username and password to log on to the MyLO system. Once authenticated by the system your personalised MyLO Learning Online area will be displayed. It contains links to the websites that you have permission to access - including the website for this unit.
If you are not able to access the unit website, please contact the technical staff at SOU.

Prescribed Text

Software
The software that you will need to access the unit website and to study this unit, including general purpose software such as word processors, is provided on the computers in the computing labs. If you intend to use software on other computers please check that the versions are compatible.

- Current version of Java SE Development Kit (JDK); available free: http://java.sun.com/javase/downloads/index.jsp
- Current version of jGRASP; available free: www.jgrasp.org

GENERAL RESOURCES

School Website
School of Computing and Information Systems - Faculty of Science, Engineering, and Technology.

Faculty Website
Information and Resources for Faculty of Science, Engineering and Technology students are available on the faculty website at: http://www.utas.edu.au/scieng
GENERAL ASSESSMENT

Approach to Learning

The University is committed to high standards of professional conduct in all activities, and holds its commitment and responsibilities to its students as being of paramount importance. Likewise, it holds expectations about the responsibilities students have as they pursue their studies within the special environment the University offers.

The University's Code of Conduct for Teaching and Learning states:

Students are expected to participate actively and positively in the teaching/learning environment. They must attend classes when and as required, strive to maintain steady progress within the subject or unit framework, comply with workload expectations, and submit required work on time.

You are expected to spend about 130 hrs studying in this unit - this includes attendance at scheduled teaching sessions. (For a 13 week semester this is, on average, 10 hr/wk.) This is the amount of study time that the 'typical' student will need to reach the level of competence and understanding required to fulfil the unit objectives. You are expected to:

- attend all scheduled teaching sessions, unless otherwise notified by the unit coordinator
- prepare for, and actively participate in all scheduled teaching sessions
- complete the assigned learning tasks
- review what has been learnt
- complete assessment items and submit them on time
- access and be familiar with the information and resources available on the unit website
- seek help from teaching staff if you have any questions or difficulties in studying this unit

You are encouraged to read the university's Code of Conduct for Teaching and Learning. Part A describes the 'Responsibility of the University to Students' and part B describes the 'Responsibilities of Students to the University'.

It is expected that students will familiarise themselves with access and use of the MyLO system operated by the University for the electronic delivery of course materials, and for various forms of communication.

It is expected that students will consult email sent to their University email address at least twice a week for notices relating to the administration of the unit, and for notification of the results of assignments.

It is expected that students will read the background material specified in the course curriculum, will actively attend and participate in tutorials, and be prepared to discuss relevant issues arising with tutors, lecturers and fellow students.

Student Expectations of the Unit

Students enrolled in this Unit may reasonably expect the following:

1. To be able to contact a lecturer or tutor by electronic mail, to raise issues arising in the unit, either relating to content or student performance within the unit.
2. Subject to availability, to be able to discuss such issues in person with the lecturer or tutor.
3. That assignments will be marked and the marks will normally be returned within 3 weeks of due dates.
4. That all relevant notices regarding the administration of the unit, including any necessary changes, will be communicated to all students enrolled in the unit via email.

These expectations are in addition to those specified in relevant University regulations.

Plagiarism

Unless specifically stated in the specification of the assessment item provided on the unit website, it is required that:

- work submitted by a student is the work of that student alone OR
- where the assessment item is to be completed by a group of students, the work submitted by the group of students is the work of that group of students alone.

While students are encouraged to discuss the assignments in this unit and to engage in active learning from each other, it is important that they are also aware of the University's policy on plagiarism. Plagiarism is taking and using someone else's thoughts, writings or inventions and representing them as your own; for example downloading an essay wholly or in part from the internet, copying another student's work or using an author's words or ideas without citing the source.

"Plagiarism is a form of cheating. It is taking and using someone else's thoughts, writings or
inventions and representing them as your own; for example, using an author's words without putting them in quotation marks and citing the source, using an author's ideas without proper acknowledgment and citation, copying another student's work.

If you have any doubts about how to refer to the work of others in your assignments, please consult your lecturer or tutor for relevant referencing guidelines, and the academic integrity resources on the web at http://www.academicintegrity.utas.edu.au.

The intentional copying of someone else's work as one's own is a serious offence punishable by penalties that may range from a fine or deduction/cancellation of marks and, in the most serious of cases, to exclusion from a unit, a course or the University. Details of penalties that can be imposed are available in the Ordinance of Student Discipline – Part 3 Academic Misconduct, see http://www.utas.edu.au/universitycouncil/legislation/.

The University and any persons authorised by the University may submit your assessable works to a plagiarism checking service, to obtain a report on possible instances of plagiarism. Assessable works may also be included in a reference database. It is a condition of this arrangement that the original author's permission is required before a work within the database can be viewed."

It is important that you understand this statement on plagiarism. Should you require clarification please see your unit coordinator or lecturer. Useful resources on academic integrity, including what it is and how to maintain it, are also available at: http://www.academicintegrity.utas.edu.au

Referencing

The preferred text referencing systems for the School is the Harvard system (also referred to as the author-date system). In your written work you will need to support your ideas by referring to scholarly literature, works of art and/or inventions. For information on presentation of assignments, including referencing styles: http://utas.libguides.com/referencing

It is important that you understand how to correctly refer to the work of others and maintain academic integrity. Failure to appropriately acknowledge the ideas of others constitutes academic dishonesty (plagiarism), a matter considered by the University of Tasmania as a serious offence. The university document on plagiarism contains information about referencing the work or ideas of others (see http://www.utas.edu.au/plagiarism/).

Submissions

The details of the submission method (paper, electronic or other) for each assignment will be supplied in a separate assignment specification sheet. All in-semester assignment submissions (including electronic submissions) are to include an Assignment Cover Sheet which includes a statement confirming that the submission is your own work. If this undertaking is not signed, the assignment will not be marked. The Assignment Cover Sheet is available on the School's web site http://www.cis.utas.edu.au/cisview/resources.jsp.

Extensions

Assessment items will not be accepted after the due date except under the conditions stated in the School policy on late assessment. http://www.cis.utas.edu.au/downloads/ExtensionPolicy.pdf (PDF - 100KB).

Review of Assessment and Appeals

1. It is expected that students will adhere to the following policy for review of any piece of continuous assessment.

   a. Within 5 days of the release of the assessment result, the student should request an appointment with the Lecturer. The student should be prepared to discuss specifically which section of the marking criteria they are disputing and why they consider the mark is inappropriate.

   b. Following this discussion, students may request a formal remark of the original submission (in accordance with Rule of Academic Assessment 111, clause 22.1). This remark will be undertaken, where practicable, by an alternative assessor.

2. Students may also request a review of the final result in a unit. The request and payment must be made within 10 days from the date of the result notification. Students are referred to Rule of Academic Assessment 111, clause 23 at http://www.utas.edu.au/universitycouncil/legislation/rule111.pdf and http://www.admin.utas.edu.au/ac_serv/flowchart_review_assessment.pdf.

Complaints Procedure

It is expected that students will adhere to the following policy for making any complaint or grievance directly related to a Unit:

a. In the first instance, students are to approach the Lecturer or Unit Coordinator concerned and arrange a time to speak with them about their concern.

b. If an issue remains unresolved, the student should approach the Head of School and arrange a time to speak with them about their concern.

If the School's internal policy of complaints is unable to resolve an issue, students should consult Ordinance 8 Student Complaints for further direction, see http://acserv.admin.utas.edu.au/complaints_info.html
Formal Examination

The formal examination will be held at SOU, Shanghai, and is conducted by the University Registrar.

Final Grade

Passing grades will be awarded based on the AVCC guidelines:

- PP at least 50% of the overall mark but less than 60%
- CR at least 60% of the overall mark but less than 70%
- DN at least 70% of the overall mark but less than 80%
- HD at least 80% of the overall mark

In order to comply with the benchmarks set by the Faculty of Science, Engineering & Technology for distribution of grades in units, both the in-semester and examination marks that students obtain may be adjusted either upwards or downwards. See [http://fcms.its.utas.edu.au/scieng/scieng/policies.asp](http://fcms.its.utas.edu.au/scieng/scieng/policies.asp) for details of the Faculty Assessment Guidelines.
